MEDIA ACCOLADES

Global recognition for innovation in mining infrastructure

EQ NOVA

PI PROGRAMMING INSIDER

With a decade of experience, a clear vision, and operations that directly benefit both host countries and global participants, EQ Nova Limited is not just part of the digital future—it is helping build it.

<https://programminginsider.com/eq-nova-limited-converts-surplus-electricity-into-global-innovation/>

DIGITAL JOURNAL

EQ Nova has established itself as the global standard-bearer for 21st-century digital infrastructure. As adoption accelerates worldwide, EQ Nova isn't just keeping pace—it is setting the pace.

<https://www.digitaljournal.com/pr/news/binary-news-network/eq-nova-limited-redefining-21st-century-1374403026.html>

USAWIRE

With integrity, resilience, and a disciplined approach, EQ Nova continues to create long-term value and define what leadership looks like in a changing world.

<https://usawire.com/eq-nova-sets-sights-on-the-future-with-strategic-ai-expansion/>

koreantech.org

EQ Nova confidently moves into this new phase, sending a clear message: this is not just another launch, but the beginning of a new movement.

<https://koreantech.org/eq-nova-limited-%EA%B3%B5%EC%8B%9D-%EA%B8%80%EB%A1%9C%EB%B2%8C-%EB%9F%B0%EC%B9%AD-%EB%B0%9C%ED%91%9C/>

MEMBER RATINGS – TraderKnows

Trusted by a growing global community of miners

Philippines

What I love most is the peace of mind. I don't have to wake up checking charts or worry about dips. My BTC balance grows steadily with every block mined. The platform feels professional, the payouts are punctual, and the support team actually cares.

United Kingdom

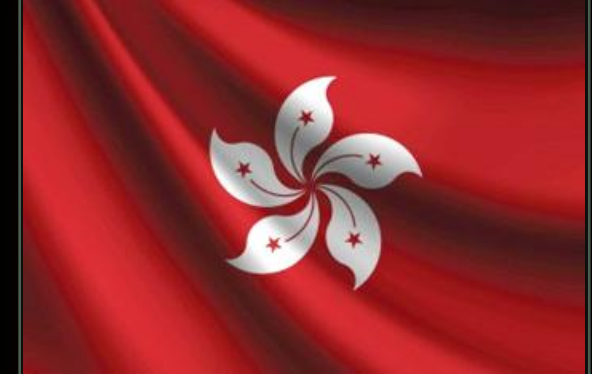

Every time I log into EQ Nova, I'm reminded of how professional and dependable they are. The platform is reliable, the system is consistent, and the experience is stress-free. In mining, where so much can go wrong, EQ Nova has created something you can truly count on.

South Korea

Other mining companies felt overwhelming to get started with—too many technical terms, complex settings, and confusing setups. EQ Nova feels different. It's a platform that makes mining approachable and positive. Once you sign up, everything runs smoothly, and so far it's been operating without any issues. It finally feels like a mining service built for everyday users.

HongKong

I used to worry constantly about timing when buying Bitcoin—the market moves so fast that it's easy to buy at the peak and get stuck. After a friend recommended EQ Nova, I realized earning Bitcoin could be this stable and effortless.

SECTION 03

TO MINE OR NOT TO MINE?

Evaluating timing, risk, and operational edge

03

WHY MINE BITCOIN?

Strategic advantages of digital asset infrastructure

01 LONG TERM PROFITABILITY

Bitcoin's scarcity model and diminishing supply create potential for significant value appreciation over time.

02 PASSIVE RECURRING INCOME

Generate consistent rewards through automated mining operations without the need for active daily trading.

03 NETWORK CONTRIBUTOR

Secure the decentralized ledger, validate transactions, and support the foundation of the global financial infrastructure.

MINING ENTRY BARRIERS

Challenges facing individual and small-scale miners

EQ NOVA

01 HARD-TO-GET MINING RIGS

Advanced ASIC miners are often sold out or restricted to bulk institutional buyers, making retail acquisition difficult and expensive.

02 HIGH COST & COMPLEX SETUP

Significant upfront capital is required for hardware, cooling infrastructure, and power distribution units, creating a steep entry cost.

03 MAINTENANCE DIFFICULTY

Requires 24/7 technical oversight to manage heat, dust, firmware updates, and hardware failures to avoid costly downtime.

EQ NOVA

SECTION 04

WHERE INFRASTRUCTURE MEETS INTELLIGENCE

EQ NOVA aligns physical infrastructure with AI-driven optimization for sustainable performance and operational excellence.

04

INTRODUCTION

Previously registered under EQ Lab Technology Limited in Colorado since 2023, the company swiftly established itself as a pioneering force in Bitcoin mining and blockchain infrastructure innovation. Initially focused on cutting-edge research, the company has rapidly evolved into a full-scale operational powerhouse.

In 2025, EQ Lab rebranded as EQ Nova, signaling a shift toward enterprise-scale deployment and tokenized infrastructure. Backed by a Money Services Business (MSB) license and providing mass market access to global mining pools, EQ Nova is scaling globally and leading digital asset innovation.

Growth Tracks 1, 2, 3

EQ NOVA

TRACK 01 BITCOIN MINING SCALE-UP

Continuous expansion of Bitcoin mining operations by optimizing infrastructure, and maximizing uptime—building stable, scalable revenue streams.

TRACK 02 MULTI-CRYPTO, MULTI-POOL EXPANSION

Strategically mining Litecoin, Bitcoin Cash, and Dogecoin, while targeting other high-yield cryptos, and integrating with leading global pools, we diversify income streams and mitigate risk.

TRACK 03 GLOBAL INFRASTRUCTURE DEPLOYMENT

Developing energy-efficient data centers across Asia and LATAM, enhancing operational resilience and mining scalability through NOVAGRID™.

Tokenized Yield & RWA Products

As EQ Nova scales mining, diversifies assets, and deploys global infrastructure, we unlock the ability to transform physical mining assets into financial products. This track leverages the foundation built by Tracks 1–3 to drive liquidity, accessibility, and long-term investor value.

BTC Yield Producing Bonds

Fixed-income instruments backed by verifiable mining production, offering predictable returns in a volatile market.

Mining Equipment Assets

Tokenized ownership of high-performance ASIC fleets, allowing fractional investment in physical hardware.

Land & Energy RWA

Real World Asset tokens representing equity in our sustainable data center real estate and power infrastructure.

Forbes

FORBES DIGITAL ASSETS

BlackRock's \$10 Trillion Tokenization Vision: The Future Of Real World Assets

Published Mar 21, 2024, 01:27pm EDT

Wall Street and retail investors are looking at tokenized real world assets: bonds, equity, and real estate, on blockchain. [PROFIT INC](#)

We are currently witnessing a digital transformation as traditional finance and investments undergo a seismic shift towards greater efficiency and accessibility.

Leading the charge, BlackRock [BLK.O](#), the world's largest asset manager known for launching its Bitcoin ETF earlier this year, aims to tokenize \$10 trillion of its assets in partnership with Securitize. Carlos Domingo, Securitize co-founder and CEO, remarked, "Today's news demonstrates that traditional financial products are being made more accessible through digitization."

REUTERS

China property developer Seazen says it will explore real-world asset tokenization

By Reuters

August 30, 2025

HONG KONG, Aug 29 (Reuters) - Chinese property developer Seazen Group ([1030.HK](#)), is setting up an institute in Hong Kong to push forward real-world asset (RWA) tokenization, it said on Friday, a process that converts assets into digital tokens that can be traded on a blockchain.

A move to raise funds with tokens would be the first by a major Chinese developer. Property companies have been scrambling for liquidity since the sector slipped into a debt crisis in 2021, leading to many defaults.

Seazen, which is deemed to be financially sound, said in a stock exchange filing earlier on Friday it has created the Seazen Digital Assets Institute to

TheStreet

First-ever RWA tokenization ETF by Ondo Finance filed by 21Shares

24 July, 2025

First-ever RWA tokenization ETF by Ondo Finance filed by 21Shares originally appeared on TheStreet.

21Shares has submitted a Form S-1 with the U.S. Securities and Exchange Commission (SEC) on July 23 for an ETF tracking ONDO, the native token of Ondo Finance. If passed, it would also be the first US-based ETF targeted at a token that supports a real-world asset (RWA) tokenization platform.

The filing—made under "21Shares Ondo Trust"—suggests a growing appetite among institutional investors for tokenized finance, with a
